The 2nd annual symposium hosted by the University of Oregon Microbial Ecology and Theory of Animals (META) Center will explore emerging frontiers in host-microbe systems biology. Program features will include seminars on cutting edge research and open forum discussions aimed at fostering crosstalk between researchers specializing in microbial ecology and evolution, model organisms, and human disease.

CONFIRMED PARTICIPANTS

Julie Segre // keynote speaker
National Institutes of Health

Rustom Antia
Emory University

Brendan Bohannan
University of Oregon

Mohamed Donia
Princeton University

Khrys Duddleston
U. of Alaska at Anchorage

Nels Elde
University of Utah

Claire Fraser
University of Maryland

Tadashi Fukami
Stanford University

Stephen Giovannoni
Oregon State University

Jessica Green
University of Oregon

Karen Guillemin
University of Oregon

Curtis Huttenhower
Harvard University

Pankaj Mehta
Boston University

Raghu Parthasarathy
University of Oregon

David Relman
Stanford University

Margaret Romine
PNW National Laboratory

June Round
University of Utah

Rustam Antia
University of Texas

Natalia Shulzhenko
Oregon State University

Michael Travisano
University of Minnesota

Carolina Tropini
Stanford University

Tristan Ursell
University of Oregon

Steve Wiley
PNW National Laboratory
