The 3rd annual symposium hosted by the University of Oregon Microbial Ecology and Theory of Animals (META) Center will explore emerging frontiers in host-microbe systems biology. This year we will feature seminars on cutting edge research and open forum discussions aimed at fostering crosstalk between researchers specializing in microbial ecology and evolution, model organisms, and human disease.

CONFIRMED PARTICIPANTS

▶ Sarkis Mazmanian // keynote speaker
    California Institute of Technology

▶ Eric Pamer // keynote speaker
    Memorial Sloan Kettering Cancer Center

Matthew Barber
University of Oregon

Brendan Bohannan
University of Oregon

Judith Eisen
University of Oregon

Claire Fraser
University of Maryland

Karen Guillemin
University of Oregon

Joey McMurdie
Whole Biome

Raghu Parthasarathy
University of Oregon

David Relman
Stanford University

Nadia Singh
NC State University

Steve Wiley
PNW National Laboratory

Ran Blekhman
University of Minnesota

William Cresko
University of Oregon

Susan Erdman
MIT

Tracy Grikscheit
U. of Southern California

Robert Martindale
Oregon Health Sciences U.

Emily Miraldi
Simons Foundation

Seth Rakoff-Nahoum
Harvard University

Thomas Sharpton
Oregon State University

Li Wen
Yale University

July 1st is the deadline for registration and abstract submission. For information on accommodations and symposium updates visit meta.uoregon.edu
